I can't believe we're in Term 5. This has been a brilliant term we all worked hard in all our learning. All of the you were a credit to yourselves with how hard you worked in Term 4. Our attendance was excellent, the attendance trophy was in our class twice this last Term, we also had fun time from our Teacher's choice. Feel like a very proud teacher and I hope you are all proud of yourselves too. We are looking forward to more exciting and fully engaged learning this Term.

Literacy Term 5 was awesome, we enjoyed our fiction story 'Hortense and her Shadow' we managed to write our own fantastic summary of the story. In the non-fiction section we were amazing newspaper reporters, reporting about the bandits' unexpected visit to Hortense's house. I'm really excited to our Term 6 story.

Mathematics We are moving onto time, we have just covered Multiplication. We worked really hard learning our 2,3,4,5,8 and 10 times table, we also used stem sentences to multiply and divide by 10. We also had a fabulous of finding amounts of fractions. We are looking forward to yet another good time in Term 6, learning about Time.

Topic This has certainly been an interesting term, as we managed to use Atlases to visit different Mountains and Rivers of the UK and the World. Continents and the UK is our exciting Term 6 area of study.

Science Well done to you all, we had fun learning about Humans and animals in Science. Let's explore more scientifically in term 6.

We are incredibly proud of our hard work in term 5 including our attendance. **I am excited to start term 6, and I know you are too.**
